
Explanation of inactivity fees

Dear clients,

We hereby explain in more detail the decision on commissions for inactive accounts.

As we are a regulated firm, your account has negative balance protection, this means that no more money than you have can be taken out, which would mean that if you have 0 money in your account, these commissions will not be taken out. Also, if you have an account balance of less than USD 20, an amount up to USD 0 will be deducted, which in practice would mean that if you have USD 14, USD 14 will be deducted and your account balance will be USD 0.

Also, we are once again sending the aforementioned decision on commissions for inactive accounts published on our website on 22.12.2023.

Our company makes a decision on setting commissions as follows:

1. Commission for maintaining inactive accounts - a commission that will be charged starting from 01.01.2024 for all Metatrader accounts that were not active in the period of three months before the settlement date. The commission will be charged monthly on the first of every month in the amount of 20 USD.
2. Commission for withdrawing money
commission that will be charged starting from 01.01.2024 in the following cases:
 - for all clients who withdraw money within a month from the payment and approval of the account for trading and did not trade, i.e. did not have a single transaction
 - for all clients who withdraw money within three months from the payment and approval of the trading account and did not trade, that is, did not have a single transaction per month within a period of three months from the day of approval of the trading account
 - for all these clients and cases, a commission will be charged for inactive accounts when withdrawing money in the amount of 20 USD for each withdrawal
